

Suffered 20 Years.

MRS. MARY LEWIS, wife of a prominent farmer, and well known by all old residents near Belmont, N. Y., writes: "For twenty-seven years I had been a constant sufferer from nervous prostration, and paid large sums of money for doctors and advertised remedies without benefit. Three years ago my condition was alarming; the least noise would startle and unnerve me. I was unable to sleep, had a number of sinking spells and slowly grew worse. I began using Dr. Miles' Restorative Nervine and Nerve and Liver Pills. At first the medicine seemed to have no effect, but after taking a few bottles I began to notice a change; I rested better at night, my appetite began to improve and I rapidly grew better, until now I am as nearly restored to health as one of my age may expect. God bless Dr. Miles' Nervine."

WILSON'S LATEST THEORY.

The Professor is "Regardless of Economic Policy" as Usual.

Free Trader Wilson has an article in the July number of one of the magazines on "The Battle of the Tariffs." To any careful and thoughtful reader the article would give conclusive proof of the utter unfitness of Mr. Wilson to have any hand or any word in shaping the economic policy of this country, if such proof had not already been supplied in abundant measure by the provisions of the Wilson tariff bill. In one paragraph Mr. Wilson states that the total value of imports for the fiscal year ended June 30, 1893, under the McKinley law, was \$866,000,000 and that for the fiscal year 1896, under the law of 1894 (i. e., the Wilson-Gorman law) the total value of our imports was \$770,000,000. A few paragraphs further on he has apparently forgotten all about his own figures, which showed greater imports under the protective McKinley law than under the free trade Wilson-Gorman law, for in speaking of the Dingley bill he says, "It tends still more to accomplish the avowed purpose of the McKinley bill, to check imports." Further on he says:

"The law of 1894 was framed in the belief that with free access to the materials of industry and moderate taxation our manufacturers and workmen could soon command their share of the world's markets. . . . That belief has been splendidly and quickly justified." And this in face of the unprecedented distress and disaster which have run riot in the country ever since the passage of that industry destroying law, this when the workmen have neither "commanded their share of the world's markets" nor even kept the home market which they had before. But to point out the absurdities in Mr. Wilson's article would require another article as long as his. One other point, however, must be touched on. It offers the key to Mr. Wilson's economic policy and that of his fellow free traders. He says:

"Regardless of economic policy"—that is what free traders have always been. The disastrous results of all our trials of free trade or of partial free trade would long ago have convinced any one who had regard for sound economics of the utter fallacy and danger of that system. Fortunately for the country, those in charge of its affairs today are as devoted to a sound economic policy for the protection of American interests as they are to the securing of sufficient revenue for the expenses of the government. The free traders, as voiced by Mr. Wilson, say, "Revenue regardless of economic policy," and then they don't secure even the revenue, as our deficit under the Wilson-Gorman law shows. Protectionists say, "Revenue and a sound economic policy for the protection of American interests," and they see to it that both are secured for the American people.

Hurrah For Protection.

Democratic and Republican Ways.

Mr. Cleveland was inaugurated March 4, 1893. The tariff for deficit bill became law Aug. 28, 1894, 17 months later. From 1892 the dread of that enactment was active in drying up the fountains of industry, inflicting losses aggregating billions. Mr. McKinley was inaugurated March 4, 1897. On July 24, 1897, the tariff for deficit law was supplanted by a law for revenue, protection and prosperity, or 4 1/2 months from the day the Republican party came to power. The times have been brightening ever since Nov. 4, 1896. Government by the Republican party is synonymous with prosperity. —Utica Herald.

Cheap Goods Coming.

Those importers who, in anticipation of the enactment of a protective tariff law, have been filling their warehouses to overflowing with foreign goods may have overreached themselves. Many retail dealers in dry goods are buying conservatively in expectation of a big break in the market later, due to the laying in of such an overstock on the part of the importers. It may be that these importers will get a severe punishment for having, by the tremendous amount of their recent imports, deprived the American people of such an amount of labor.

Removing an Apprehension.

Senator Teller says he has no desire to return to the Republican party, so there will be no further necessity for the Republican party to keep its doors locked. —Kansas City Journal.

COLORADO DEMOCRACY MEETS.

Nominates a Straight Democrat for the Supreme Court.

Denver, Sept. 7.—The Democrats of Colorado yesterday decided that hereafter there shall be no more fusion by that party with any other. After a heated session John A. Gordon, of Las Animas county, a straight Democrat, was nominated for supreme court judge by the decisive vote of 233 to 167. A notable event was the announcement made on the floor of the convention by a silver Republican that Judge Hayt, who was nominated last week by the Republicans at Denver and Silver Republicans at Glenwood, would not accept the Denver nomination because it would necessitate his endorsement of the St. Louis platform, whereas his sympathies were with that promulgated at Chicago.

The platform adopted by the Democrats after referring in laudatory terms to Hon. William J. Bryan and predicting his election to the presidency in 1900, says: "We believe the free coinage of silver at the ratio of 16 to 1 to be the paramount issue before the people of the nation and until settled rightly it should be the supreme question in every election, whether national or local. We expressly pledge ourselves to do all in our power, whether alone or in conjunction with others who believe in the same thing, to defeat any candidate who accepts a nomination by those who are opposed to the principles of the Chicago platform." "Government by injunction" was touched up.

Gilded Beauties.

The eastern women, especially those in Turkey, paint their eyebrows with gilt paint, and at night the effect is very brilliant and oriental. When, by chance, a Chinese girl has eyes that are not quite so slanting as usual, she can safely lay claim to special beauty. Many Japanese women gild their teeth, while the beauties of the Indies stain theirs a brilliant red. Some of the Africans stain their teeth a jet black. Persian women pencil the outer corners of their eyes to make them look almond shaped, which is considered an especial mark of beauty. The women in many oriental countries also their finger nails with henna, otherwise at them grow to an enormous length.

Temper.

Temper itself is not a bad quality. It is not to be destroyed, as we sometimes say. Without temper a bar of steel becomes like lead. A man without temper is weak and worthless. We are to learn self control. A strong person is one who has a strong temper under perfect mastery. There is a deep truth here—that our mistakes and our sins, if we repent of them, will help in the growth and upbuilding of our character.—Housewife.

Bessarabia.

One of the most productive sections of the world is the Russian province of Bessarabia, taken from Turkey in 1878. Its vineyards often yield 800 gallons of wine per acre. The average yield of wheat is 35 bushels, and of maize 60 bushels.

A Fashion Note.

Doctor (to female patient)—You've got a slight touch of fever. Your tongue has a thick coat—

Patient (excitedly)—Oh, doctor, do tell me how it fits!—Facts and Fiction.

There is no sense in trying to dodge around a tree. The only way is to come squarely out and face the difficulty and fight it. If you are sick or half sick, the best course is not to neglect or ignore it, or pretend that it doesn't exist, but to find the proper remedy and use it. A bilious, dyspeptic condition of the system not only makes life miserable, but it is sure to lead to something worse, unless promptly taken in hand and corrected. It is foolish to attempt to dodge such troubles by any mere temporary expedient. The only sensible way is to get rid of them for good and all by a thoroughly rational, scientific medicine like Dr. Pierce's Golden Medical Discovery.

It cures all disordered, debilitated conditions by its direct action upon the liver and digestive organs; it gives them power to make fresh, healthy blood free from bilious impurities; it drives all disease germs out of the circulation; it creates solid, muscular flesh and constitutional power.

Lung and throat affections, which are often simply the result of impaired nutrition, are reached and cured by this wonderful "Discovery" in cases where cod liver oil emulsions are useless, because the "Discovery" is readily assimilated by delicate stomachs. It is far superior to malt extracts, because its beneficial effects are permanent.

Dr. Pierce, I am one of your most grateful patients," writes Mrs. Annie M. Norman, of Equinunk, Wayne Co., Pa. "I have taken 'Golden Medical Discovery,' also 'Favorite Prescription' and 'Pellets' with wonderful results. I am, as many of my friends tell me, like the dead brought to life. The doctors said I had consumption and death was only a matter of time. That was six years ago. I concluded to try your medicine. I continued until I had taken nine bottles of 'Discovery' and several bottles of 'Pellets.' I got well and have done a great deal of hard work since."

When the liver and bowels don't work, the body and brain won't. Dr. Pierce's Pleasant Pellets are a sure, speedy, and permanent cure for constipation, and a torpid liver. One "Pellet" is a gentle laxative and two a mild cathartic.
